About Program

This 'Pay After Placement' UI/UX design and analyst course will make you go through intensive training from industry experts for 7 months. Those interested in making a successful career transition to UI/UX design and analysis or growing in the field will be provided with comprehensive training in this advanced certification course. The course curriculum was carefully prepared to include all the cutting-edge skills that you will need. You will start with the basics and move on to advanced techniques that will make you industry ready by the end of the course.

Learning Format
Online Bootcamp

7 Months
Duration

Pay Only After You
Get a Job

Intellipaat
Certifications

Key Highlights

- Pay Tuition Fees only once you get a data analyst
- 7 Months of Live Classes From Top Industry Experts
- Extra hands-on Sessions over Weekdays
- Project-based Live Learning
- Career Services and Soft Skills Training
- 50+ Industry Projects and Case Studies
- Internship Opportunities
- Career Services Session after every module
- Industry Experts from Top Product Companies & Startups
- 24/7 Support
- Dedicated Learning Management Mentors Team

Program Pedagogy

Instructor led Training

Get trained by industry experts from Top Product Companies & Startups

Hackathons

Get a sense of how real projects are built

Dedicated Learning Management Team

To help you with your learning needs

Peer Networking and Group Learning

Improve your professional network and learn from peers

Self-paced Videos

Learn at your own pace with world-class content

Gamified Learning

Get involved in group activities to solve real-world problems

Projects and Exercises

Get real-world experience through projects

1:1 Personalized Learning

Hands-on exercises, project work, quizzes, and capstone projects

Who Can Apply for the Course?

- Any undergraduate student looking to become a UI/UX designer or analyst
- Recent Graduates who want to pursue a career in UI/UX design or analysis

Application Process

The application process consists of three simple steps. An offer of admission will be made to selected candidates based on feedback from the admission team. The selected candidates will be notified over email and phone, and they can block their seats by just paying the registration fee. The registration fees will be refunded back to the candidate upon moving to the placement pool after clearing the Placement Readiness Test (PRT).

- 
- 1 Submit Application
 - 2 Application Review and Admission
 - 3 Pay Refundable Registration Fees and Get Started
 - 4 Placement Pool & Get Refund of your Registration Fees
 - 5 Land into your Dream Job!

Tell us a bit about yourself and why you want to join

Shortlisted candidates will be issued an admission letter for the course.

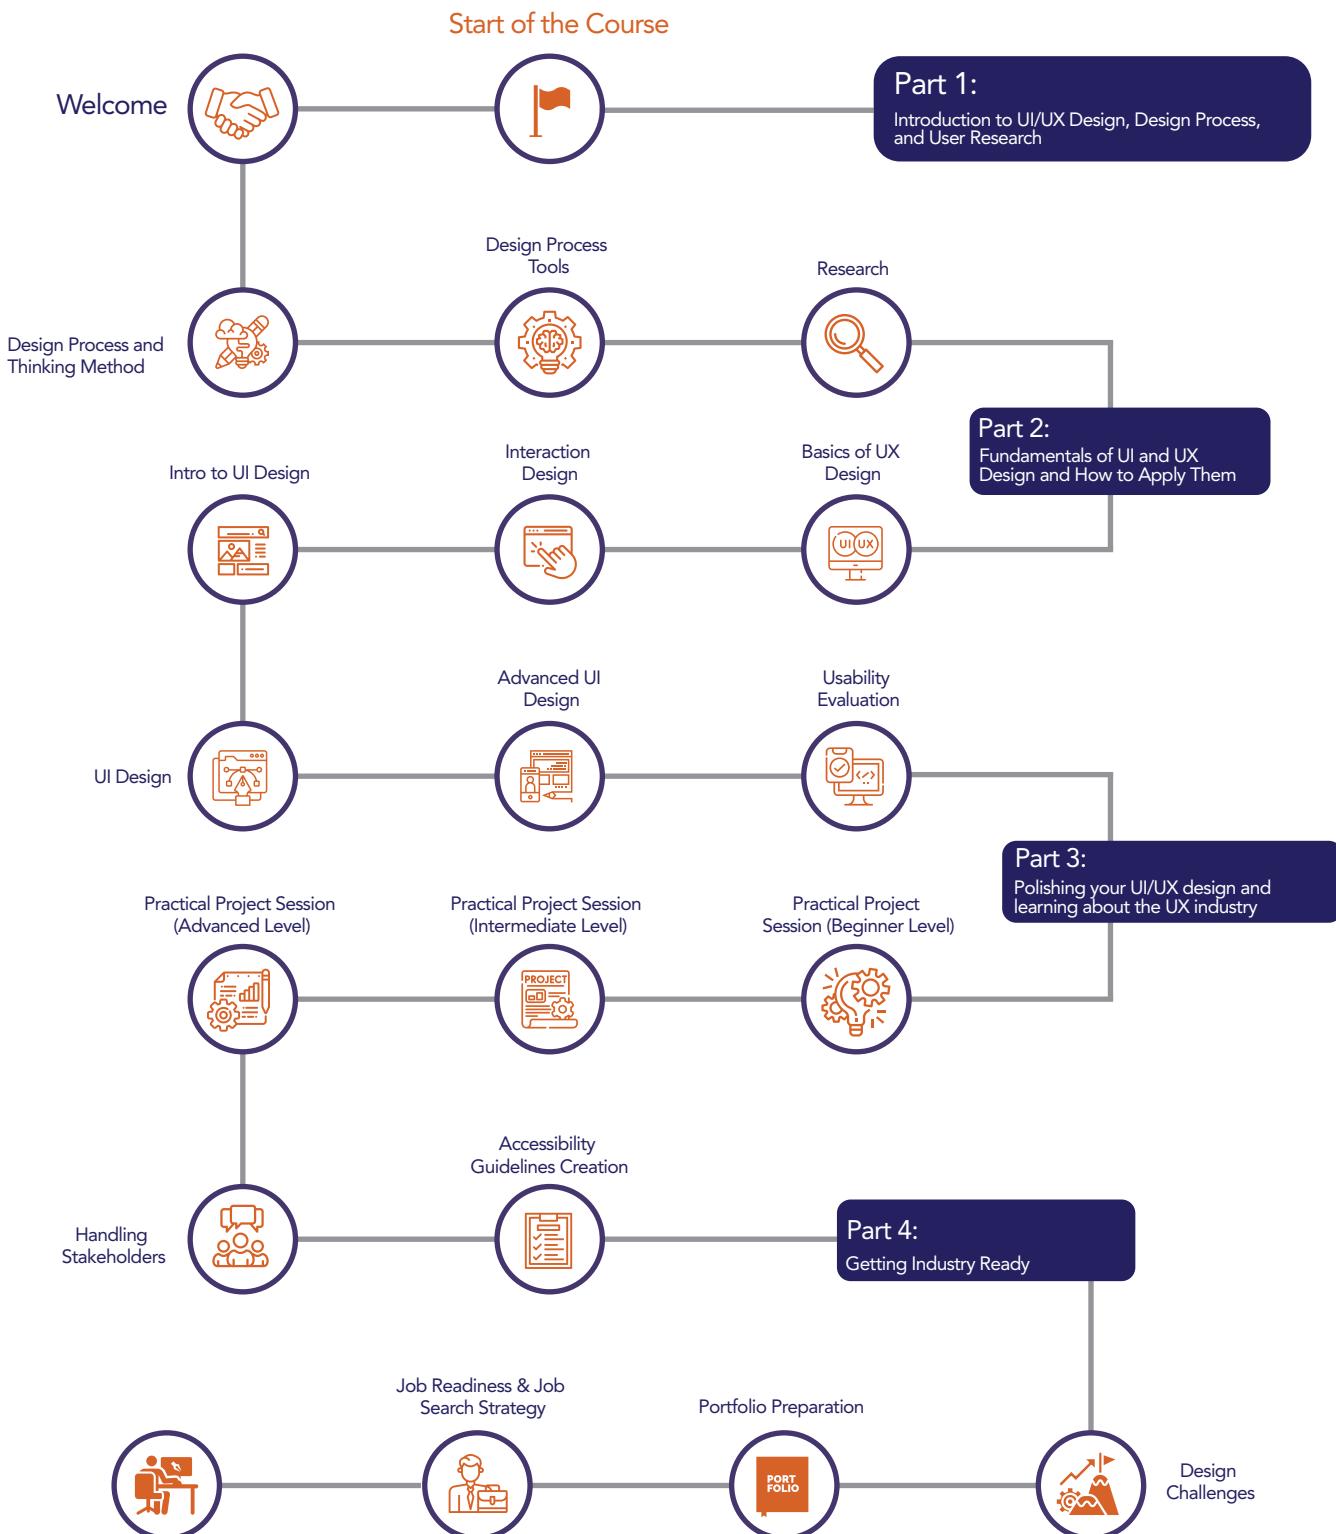

Get started with online live classes with the help of top industry mentors upon payment of the refundable registration fees. Also, sign the income share agreement.

Upon moving into the placement pool after clearing the PRT (Placement Readiness Test), get a refund of your registration fees.

First, land a UI/UX designer job and receive the first month's salary. Start paying after you receive your first salary

Learning Path

Live Courses

Become a UI/UX Designer and Analyst in 7 Months!

Program Curriculum

PART - 1: Introduction to UI/UX Design, Design Process, and User Research

Module 1

Welcome

- Introduction to Design and UI/UX
- Basics of Sketching, Observation skills, Perspective, etc.
- UI/UX Designer regime

Module 2

Design Process and Thinking Method

- Brainstorming and Mindmapping exercise
- Introduction to the design thinking process
- Design thinking methods and Double diamond model
- Build your design process

Module 3

Design Process Tools

- Affinity mapping
- Scamper and creative visualization
- Persona creation, empathy map, journey map, task flows, information architecture
- Introduction to research methodology

Module 4

Research

- Introduction and types of research
- Secondary research
- Conducting secondary research
- Primary research
- Conducting primary research (Part 1)
- Conducting primary research (Part 2)
- Conducting research process
- Qualitative and Quantitative Data

Class Feedback Session

Share work, get feedback, and learn to validate research

PART - 2: Fundamentals of UI and UX Design and How to Apply Them

Module 1

Basics of UX Design

- How UX design works
- Using the UX design process to solve problems
- Assignment - ATM machine improves the experience

Module 2

Interaction Design

- Interaction design principles and behavior
- 2. Step-by-step interaction creation

Module 3

Intro to UI Design

- UI design and elements
- Current UI design patterns
- Style guides and design systems
- Material design and other design systems

Class Feedback Session

Share work, get feedback and learn to improve your UX process

Module 4

UI Design

- The UI design process
- Principles of making a good UI design - web and mobile
- Low fidelity design, Mid fidelity design
- Creating a high-fidelity design

Module 5

Advanced UI Design

- Create prototypes
- Create mockups
- Create animations and transitions
- Figma tips and tricks for UI creation

Class Feedback Session

Share work, get feedback and learn to improve your UI quality

Program Curriculum

Module 6

Basics of UX Design

- Intro to usability evaluation
- Types of usability evaluation
- Quantitative and qualitative evaluation
- User loads (cognitive, motor, and visual)
- Conducting a usability study

PART - 3: Polishing your UI/UX design and learning about the UX industry

Module 1

Practical Project Session (Beginner Level)

- UX design case study challenge
- UI design quality challenge

Module 2

Practical Project Session (Intermediate Level)

- UX design case study challenge
- UI design quality challenge

Module 3

Practical Project Session (Advanced Level)

- UX design case study challenge
- UI design quality challenge

Class Feedback Session

Share work, get feedback, and learn to improve your design quality

Module 4

Handling Stakeholders

- Industry scenario
- Product manager discussions
- Development handoffs
- Managing business stakeholders

Module 5

Accessibility Guidelines Creation

- Introduction to inclusive design
- Three types of accessibility issues
- WCAG guidelines
- Creating accessibility sheet

PART - 3: Getting Industry Ready

Module 1

Design Challenges

- Basic design challenge
- Intermediate design challenge
- Advanced design challenge

Module 2

Portfolio Preparation

- Introduction to portfolio
- Types of portfolios - Online, Offline
- Creating a portfolio
- Industry tips and tricks
- Live sample portfolio creation

Job Readiness and Job Search Strategy

- Introduction to portfolio
- Types of portfolios - Online, Offline
- Creating a portfolio
- Industry tips and tricks
- Live sample portfolio creation

Skills to Master

- UI Design
- Guerilla Testing
- Animation
- Wireflow
- Wireframing
- Red routes
- Iconography
- Prototyping
- Figma

Course Projects

Projects cover the following industries:

Retail

Social Media

Supply Chain

Entrepreneurship

E-commerce

Banking

Healthcare

Insurance

Beginner

Design a Web App

You will have to create a website that contains vibrant colours, unique messages, slogans, and logos. These features will be used to highlight the uniqueness of the brand. You will even have to create the login flow, dashboards, in-app displays, and other related things.

Create a Wireframe Model and a Prototype of the UI/UX Design

You will be creating a prototype and wireframe model by sketching, designing, and building them. Develop a visual representation of the layout to emphasize the interface elements present on the site.

Identifying and addressing a consumer issue

You will gather information for this project in order to analyse it and pinpoint the issues that will need to be fixed. Iteratively create solutions, test them, and develop them to take care of usability issues.

Intermediate

Landing page for lead generation

It will be your responsibility to create a landing page with an enticing email and a strong incentive for users to sign up. It must also include a well-written thank you message. You'll be creating a page whose sole objective will be to entice viewers into providing their information for lead generation.

Designing a user experience to invite more viewers

In order to draw in more visitors, you will select a website and enhance the user experience. To increase the product's interactivity, you will be adding some motion elements to the UI components.

Advance

Recreating an existing app or website

Pick a dated web application or website and rebuild it from scratch. Improve the app's or website's usability and effectiveness by developing a completely new UX and UI design.

Create mobile app designs from scratch

You will be designing a mobile application from scratch for this project. For this project, wireframes and user flow diagrams must be created. Appealing animation, design patterns, and a complementary color scheme must also be included.

E-commerce website

Develop a unique aesthetic style for your e-commerce website with outstanding navigation and design for desktop and mobile devices. Your design must set your website apart from the other millions of e-commerce websites out there.

A SaaS website

You will learn how to increase sales and registrations. To understand the worries of employers and address them on your website, you must first learn the behaviors of particular clients.
